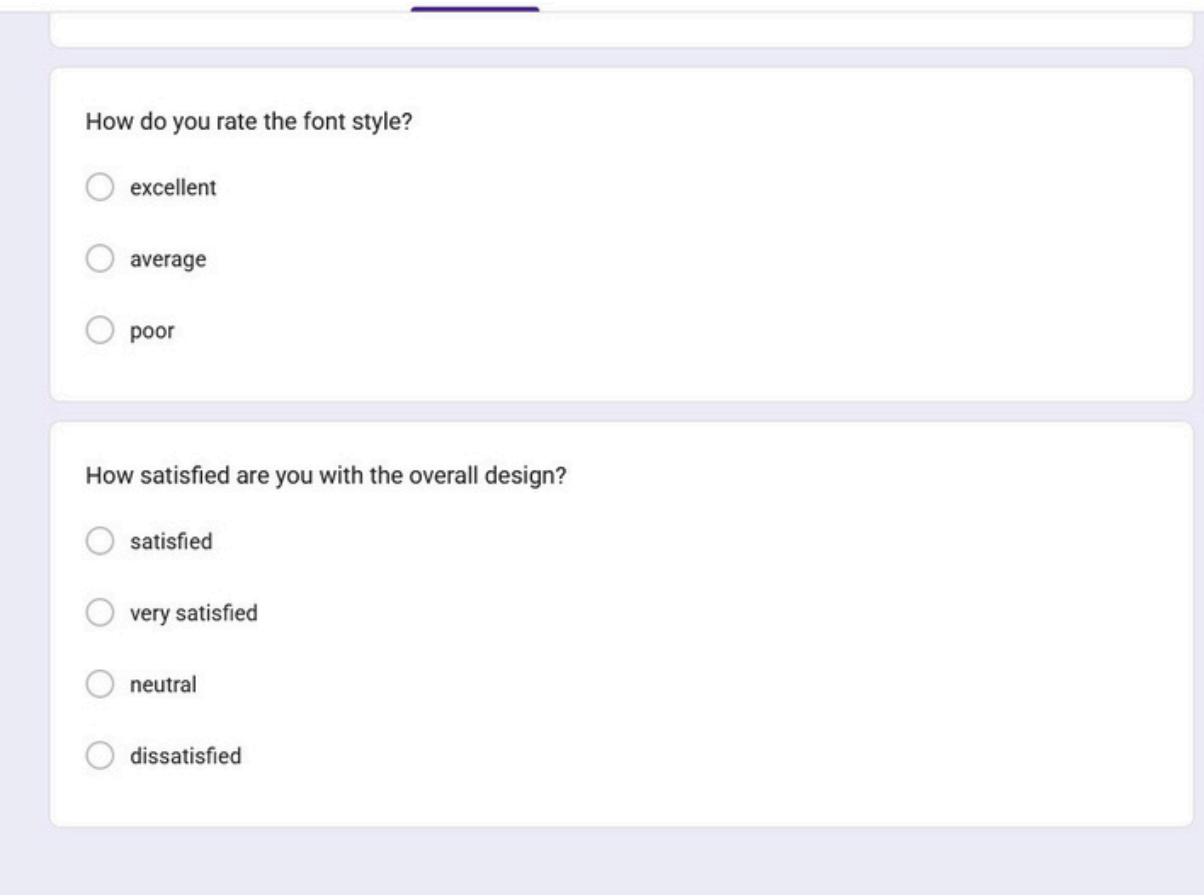
How do you rate the font style?

- excellent
- average
- poor



About the experiment :

User Interface (UI) design focuses on improving the look and feel of an application. A good design ensures:

- Better user experience (UX)
- Easy navigation
- Attractive visuals

GIMP is a free tool used to create and edit UI designs, including layouts, colors, icons, and screens.

Different layouts and color schemes were successfully created using GIMP. Based on user feedback, simple layouts with balanced colors provided better usability and visual appeal.

Conclusion

The experiment shows that UI design plays a crucial role in user satisfaction. Collecting feedback helps improve the app’s design, making it more user-friendly and visually appealing
